

## Rectangular Manways

Rectangular manways are used in a variety of different applications including dairies, breweries and hygienic industrial washing machines and autoclaves. Manways are also used by the paint and chemical industry for solvent and product storage vessels.

Available with both inward and outward opening covers, their shape compliments perfectly with flat surface mounting applications.

Consequently these manways are often the preferred choice for cubic vessels and flat sided tanks and cabinets.

Here these manways are usually installed either on the top of the vessels for easy access or are side mounted for easy inspection and cleaning.

There is now a comprehensive range of sizes offered from small inspection hatches at 130mm x 310mm through to 750mm x 750mm doors that facilitate entry to vessels with breathing apparatus.

### Features and Options:

- Sizes from 130mm x 310mm through to the 750mm x 750mm
- Special neck rings available for glass fibre and concrete tanks
- FDA approved seals in EPDM, Silicone, Viton®/FKM or Nitrile
- Working pressures of up to 2.2 Bar
- Alternative hinge mechanisms allow vertical and horizontal installation
- Sight Glass and Pressure / Vacuum Relief Valves and Mushroom Inlets

Dimensions are provided in good faith but may be subject to change, if dimensions are critical, please call the office to confirm all sizes before placing an order.
